Parent Portal - Header Picture Information

The Parent Portal colors are mostly in shades of blue, most of which are not customizable (text and background colors). You can see a demo portal here: http://parentportal.visioncps.com/

It is possible to use your own custom portal logo images in the header, but there are some guidelines to the size and type of images that can be used. There are four main .png files (images) that make up the "header area".

bga_logo_cut.png is the main image (in the upper left above the organization name). The background color is #17548D with the fixed dimensions of 356 x 110

http://parentportal.visioncps.com/Images/bga_logo_cut.png

The other three .png files (images) are the ones that get cycled through (the children that you see).

header_slide1.png

header_slide2.png

header_slide3.png

They all three have transparent backgrounds and with the same dimensions of 194x158. The important part for these images is that they have the fixed height of 158. These images can be wider than 194. The maximum width is 389, but I do advise that all three of these images have the same dimensions so they don't look weird when they switch.

The Be Great Academy impact statements you see are actually text in the actual image. So the switching images you see for Be Great Academy are 389x158 (the extra width is used for the text). You can use 389 width for the switching images, but I advise less if possible. Notice how the top right starts getting squished by wider switching images.
